

BROWNIES

CHALLENGE 1

CREATE A CRUISE

As the title says you are going to create a cruise, however there are a few rules!!!

- You can go anywhere in the world or make up your own world, however all countries must meet by sea! Create a map. How easy is it get around and follow?
- Create a list of things you will require to make your ship work (don't forget to include passengers and fuel) Remember though boats with too much will sink!!
- you have to think about how much food you will require? how many days it will take you? how long your cruise lasts?
 - What safety features are on your boat? (Be as imaginative as you like but don't forget your lifeboats)
 - Which countries are you going too? Find out one food and drink from each one? (if you have made your own country what type of food and drink are they famous for?)
- 1 country must contain at least two animals of your choice find out a little about them and how endangered they are? Why are they endangered? What can you do to help?
- Finally, the final day of the cruise all your passengers are going to a festival you have put on. which acts are you going to have? are you going to have one stage or loads? lots to think about here. Would you have a dance area? Would there be space for Photos and selfies?

Main thing is to have fun doing it, use any resource you want too and be creative!

This activity is worth 200 minutes towards Unit Meeting Activities and Theme Awards.

Unit Meeting Activities involved: Festival Fun, All Creatures Great and Small, Local Munch, Brownies on the Move and Ship Shape.
